

THATI NAVADEEP

Hyderabad, India (Open to Relocation to Bangalore / Hybrid Model) • 7093470686 • navadeep.dev12@gmail.com
linkedin.com/in/thati-navadeep • github.com/navadeep2

PROFESSIONAL SUMMARY

Detail-oriented and highly analytical Software Engineer with hands-on experience designing, implementing, and troubleshooting scalable backend systems using **Core Java** and modern **Spring Boot Microservices** architectures. Demonstrated capability to build secure REST APIs, integrate AI-driven pipelines, and optimize relational schemas in fast-paced Agile ecosystems. Solid domain familiarity in simulated **Procure-to-Pay Payroll** modules and automated ledger calculations, preparing to deliver immediate technical value to Cognizant’s hybrid engineering teams in Bangalore.

TECHNICAL SKILLS

Core Languages:	Core Java (OOPs, Multithreading, Collections), JavaScript (ES6+), TypeScript, Python, SQL (MySQL), PHP, C
Frameworks & Libraries:	Spring Boot, Spring Security, Microservices Architecture, Node.js, Express.js, React.js, Next.js, Tailwind CSS
Databases & Clouds:	MySQL (RDBMS), MongoDB, Supabase, Google Cloud Vertex AI, Cloudflare, AWS (Basics)
Architectures & Concepts:	RESTful API Design, JWT Authentication & RBAC, WebSockets, Agile/Scrum, QA Collaboration, CI/CD Baselines

PROFESSIONAL EXPERIENCE

Software Development Engineer (SDE) Cloudeon Tech	Apr 2026 – Present Hyderabad, India
--	--

- Develop high-performance REST APIs using Core Java and Spring Boot to optimize backend latency.
- Collaborate with QA, Frontend, and Product teams in Agile workflows to deliver features on schedule.
- Debug production bugs, optimizing thread pools and execution pathways for high availability.
- Participate in peer code reviews, maintaining quality and drafting technical specifications.
- Engineered an AI routing integration via secure Cloudflare Tunnels and Webhooks to automate messaging.

Software Developer Intern DIGIT IT	Feb 2026 – Apr 2026 Hyderabad, India
---------------------------------------	---

- Integrated REST APIs, bridging databases with modular React, Next.js, and TypeScript components.
- Developed and documented reusable UI components adhering to strict performance guidelines.

PROJECTS

Microservices-Based Payroll Processing API Spring Boot, Core Java, MySQL, REST APIs, Microservices	May 2026
---	----------

- Architected a lightweight microservice network simulating a Procure-to-Pay system using Spring Boot.
- Designed a normalized MySQL schema with optimized indexes for employee records and ledger calculations.
- Integrated secure JWT stateless authentication and executed unit tests to guarantee safety.

Message App Real-Time Messaging Platform Node.js, Express.js, React.js, MongoDB, WebSockets	Feb 2026 – Apr 2026
--	---------------------

- Engineered a real-time chat application with custom session validation and stateful WebSockets.
- Structured API routes and resolved state synchronization bottlenecks under tight Agile sprints.

Virtual Try-On AI-Powered Fashion Platform React Native, Node.js, Vertex AI, Supabase	Nov 2025 – Mar 2026
--	---------------------

- Built a mobile framework integrating Google Cloud Vertex AI models for overlay rendering.
- Leveraged Supabase cloud state replication to cache image histories, minimizing lookup latency.

EDUCATION

Sreyas Institute of Engineering and Technology B.Tech in Computer Science and Engineering (CGPA: 8.9 / 10.0)	Nov 2022 – May 2026 Hyderabad, India
---	---

Relevant Coursework: Object-Oriented Programming (Java), Database Management Systems (DBMS), Software Engineering (SDLC), Data Structures and Algorithms (DSA).
