PROFESSIONAL SUMMARY

Recent B.Tech graduate with experience building full-stack and AI-powered applications using Python, JavaScript, React.js, Node.js, and modern web technologies. Skilled in developing REST APIs, authentication systems, and real-time communication applications. Passionate about backend development, AI applications, and building scalable software systems.

TECHNICAL SKILLS

Languages:	Python, JavaScript (ES6+), TypeScript, Java, C, PHP, HTML5, CSS3
Tools & Platforms:	REST APIs, AWS (Basics), Git, GitHub, Google Cloud Vertex AI, Cloudflare Tunnel
Databases:	MySQL, MongoDB, Supabase
Frameworks & Libraries:	Flask, React.js, Next.js, Node.js, Express.js, Tailwind CSS, React Native
Concepts:	JWT Authentication, RBAC, Context API, React Router, Real-Time Communication
AI / Voice Technologies:	Twilio, Deepgram STT/TTS

EXPERIENCE

Software Development Engineer (SDE) Apr 2026 - Present
CloudeonTech

- Developing web applications and backend features using modern JavaScript and Python technologies.
- Working on API integrations and frontend optimization across multiple projects.
- Collaborating with teams using Git-based workflows and clean coding practices.
- Built an AI-powered restaurant phone assistant using Twilio, Deepgram STT/TTS, and Cloudflare Tunnel for webhook communication.

Software Developer Intern Feb 2026 - Apr 2026
DIGIT IT

- Developed responsive web applications using Next.js, TypeScript, and Tailwind CSS.
- Built reusable frontend components while maintaining clean and optimized UI performance.
- Collaborated on REST API integrations and frontend feature implementation.

PROJECTS

AI Restaurant Phone Assistant | Python Backend & Voice Automation Apr 2026 - Present

- Built an AI-powered restaurant phone assistant using Twilio for telephony routing and Webhook communications.
- Integrated Deepgram STT/TTS models to achieve minimal latency for conversational speech recognition and synthesis.
- Leveraged Cloudflare Tunnel to expose the local server backend securely for real-time external data streaming.
- Engineered backend application workflow architectures using conversational interfaces and context preservation.

Message App | Real-Time MERN Messaging Platform April 2025

- Built a full-stack real-time messaging application using MongoDB, Express.js, React.js, and Node.js.
- Implemented JWT authentication for secure user access and session handling.
- Built low-latency communication features using polling techniques.
- Designed a responsive Tailwind CSS interface for a mobile-first experience.

EDUCATION

Sreyas Institute of Engineering and Technology Nov 2022 - May 2026
B.Tech | CGPA: 8.9
