## PROFESSIONAL SUMMARY

Recent B.Tech graduate with experience building full-stack and AI-powered applications using Python, JavaScript, React.js, Node.js, and modern web technologies. Skilled in developing REST APIs, authentication systems, and real-time communication applications. Passionate about backend development, AI applications, and building scalable software systems.

## TECHNICAL SKILLS

**Frameworks & Libraries:** React.js, Next.js, Node.js, Express.js, Tailwind CSS, FastAPI
**Languages:** JavaScript (ES6+), TypeScript, Python, Java, C, PHP, HTML5, CSS3
**Databases:** MongoDB, MySQL, PostgreSQL, SQLite, Supabase
**Tools & Platforms:** Git, GitHub, REST APIs, AWS (Basics), Google Cloud Vertex AI, Cloudflare Tunnel
**Concepts:** JWT Authentication, RBAC, Context API, React Router, Real-Time Communication
**AI / Voice Technologies:** Twilio, Deepgram STT/TTS, ElevenLabs, LLM Integrations

## EXPERIENCE

**Software Development Engineer (SDE)** Apr 2026 – Present
*CloudeonTech*

- Developing web applications and backend features using modern JavaScript and Python technologies.
- Working on API integrations, database optimization, and frontend performance across multiple projects.
- Collaborating with teams using Git-based workflows, automated testing, and clean coding practices.
- Built an AI-powered restaurant phone assistant using Twilio, Deepgram STT/TTS, and Cloudflare Tunnel for webhook communication.

**Software Developer Intern** Feb 2026 – Apr 2026
*DIGIT IT*

- Developed responsive web applications using Next.js, TypeScript, and Tailwind CSS.
- Built reusable frontend components while maintaining clean and optimized UI performance.
- Collaborated on REST API integrations, client-side routing, and frontend feature implementation.

## PROJECTS

**Restaurant Voice AI Platform | Real-Time Voice Ordering Assistant** Apr 2026 – Sep 2026

- Built a real-time voice ordering platform using Python, FastAPI, WebSockets, Deepgram, and ElevenLabs.
- Orchestrated streaming speech-to-text, LLM tool-calling decision loops, and low-latency audio response pipelines.
- Implemented live barge-in interruption handling and automated order status synchronization.
- Designed a resilient PostgreSQL transaction model with strict isolation to process concurrent multi-tenant orders.
- Containerized microservices on cloud infrastructure operating at an efficient 50 MB RSS memory footprint.

**Message App | Real-Time MERN Messaging Platform** Apr 2025

- Built a full-stack real-time messaging application using MongoDB, Express.js, React.js, and Node.js.
- Implemented JWT authentication and bcrypt password hashing for secure user access and session handling.
- Built low-latency communication features using polling techniques and state management.
- Designed a responsive Tailwind CSS interface ensuring an intuitive mobile-first experience.
- Integrated RESTful API endpoints for conversation history retrieval and user search functionality.

## EDUCATION

**Sreyas Institute of Engineering and Technology** Nov 2022 – May 2026
*B.Tech in Computer Science and Engineering* | **CGPA: 8.9 / 10.0**
